Yealink MVC-BYOD-Extender Datasheet

Introduction

Yealink MVC-BYOD-Extender can transform MTR conference rooms that have deployed MVC devices into multi-functional conference rooms, to bring your own meeting on different video platforms. Simply plug a USB cable into your laptop, run any video software you want to use, and enjoy the immersive meeting experience provided by the audio and video equipment in the conference room. Besides, it provides a minimal deployment, including a network cable and taking 5 minutes to complete the installation and deployment.

Key Features and Benefits

- Plug and play
- Simple and flexible deployment
- Up to 100-meter deployment
